### **Alberta Social Credit Party Principles:**

- The individual is the most important factor in organized society, and as a divinely created being, with both spiritual and physical potentials and needs, has certain inalienable rights which must be respected and preserved.
- The major function of democratic government in organized society is to secure for the people the results the people want from the management of their public affairs, as far as such results are physically possible and morally right.
- Security with freedom. Material security is not enough. Each individual must be secure knowing that he or she is worthy, respected, equal and free, and that the freedom to choose his or her own destiny is an inalienable right.
- Whatever is physically possible and desirable, and morally right, should be made financially possible.
